MRV S II

DC Inverter Unit with Front Discharge

MRV S II - FEATURES

IMPROVED CONFIGURATION AND PERFORMANCE (8/10/12HP SIDE DISCHARGE)

Flexible applications with bigger outdoor capacity options.

High efficiency DC fan motor

• DC fan motor with stepless inverter control, increases efficiency by 45% comparing with AC motor.

Larger fan diameter

• Ø570mm larger axial flow fan
• Zigzag design, reduces disturbance in airflow as well as increasing air volume and reducing noise level.

High efficiency condenser

• Newly designed high efficiency inner grooved tube.
• New hydrophilic corrugated fissurefin increases efficiency.

Vector inverter control

• 180 degrees sine wave vector control, 64-bit operation
• Precision control achieves high efficiency and lower noise levels

Double pressure sensor

• Equipped with high and low voltage pressure sensors
• Accurate pressure control ensures the system runs smoothly, increasing energy efficiency.

Twin rotary DC Inverter compressor

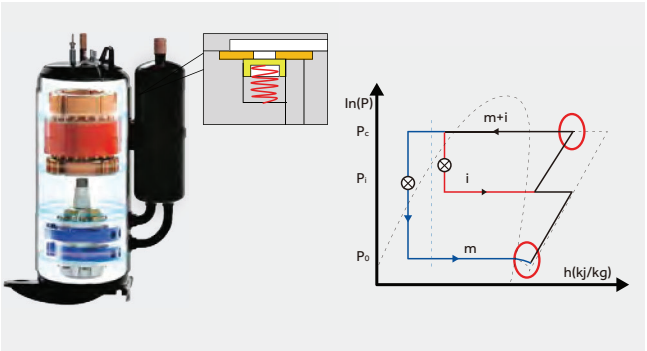
• High chamber DC inverter twin rotary compressor
• Increased energy efficiency by achieving smaller vibrations and benefiting from lower sound levels.

LEADING TECHNOLOGY (4-6HP)

Two-stage super cooling cycle technology,increases efficiency by 9%. (Double fan) 30°C maximum temperature in cooling increases unit refrigerating capacity by 46%

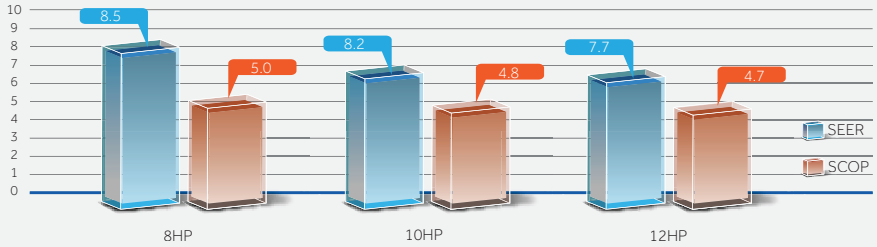
INCREASING POWERFUL HEATING CAPACITY

When the ambient temperature is low, the heat exchange capability of the outdoor unit is decreased and the amount of air returned by the compressor is reduced. By increasing the refrigerant flow during the heating cycle of the indoor unit heat exchanger, we improve the heating capacity.



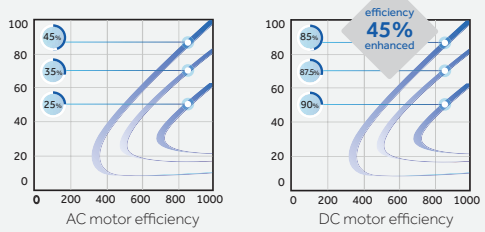
MRV S II - FEATURES

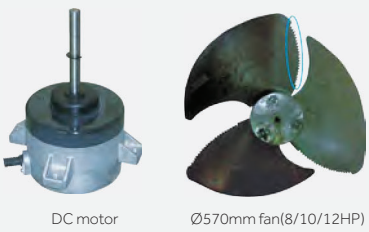
HIGH EER AND COP(8/10/12HP)



DC FAN AND FAN MOTOR

• DC inverter fan motor is highly efficient during part load operation
• 16-stage speed control; high efficiency operation especially in low speed
•45% increase in efficiency compared with AC motor due to reduced input power
•570mm diameter fan, increases air flow and achieves higher efficiency(8/10/12HP)





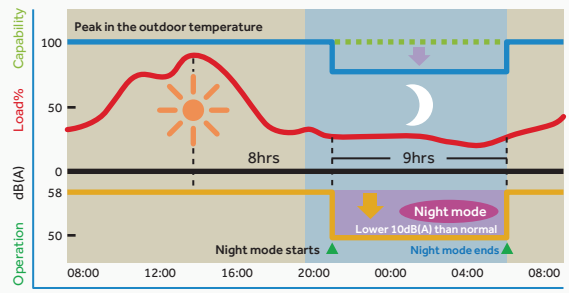
SELF-CLEANING FUNCTION ON INDOOR AND OUTDOOR UNITS

During operation, dirt accumulates on the evaporator. If the evaporator is not cleaned regularly, accumulated dirt reduces the thermal exchange by 15-30% and also promotes the proliferation of bacteria and mould.

The new Self Clean technology is the first of its kind to integrate the self-cleaning function of both the evaporator and the condenser. It starts with cleaning the evaporator, then switches to cleaning the condenser without stopping the compressor.

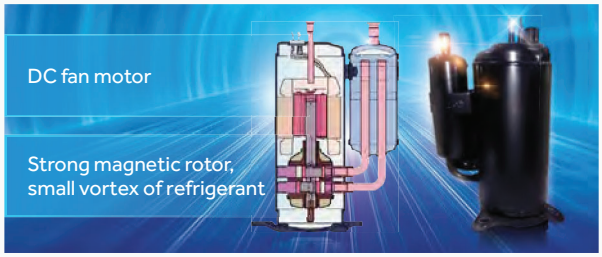
LOW NOISE LEVEL

•Night quiet operation function
•Noise levels can be reduced down to 45dB(A)



NEW DC INVERTER TWIN ROTARY COMPRESSOR

•A small torque change and a good dynamic balance of the system allows the unit to runs smoothly with little vibration, low noise levels and increased efficiency
•Increased efficiency during part load operation

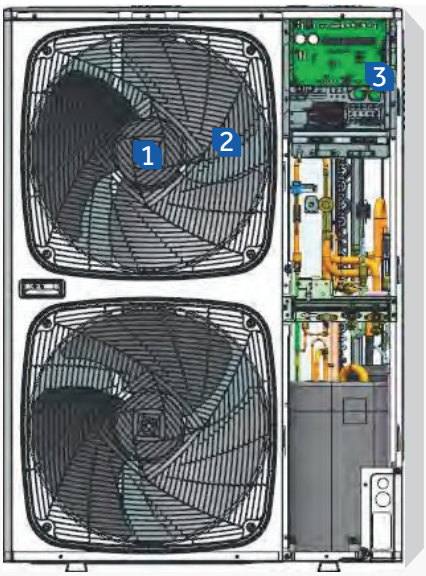


MRV S II - FEATURES

1 New aerodynamic fan
550mm super big diameter aerospace helix fan. lowering sound level by 3dB(A)

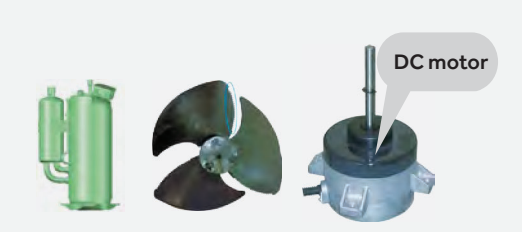
2 Enlarged air inlet path and spiral air outlet path. Air flow direction follows the grill direction which reduces sound levels by 2-4 dB(A)

3 Automatic sound reduction capability. Night mode set by the PCB is 8dB(A) lower



LOW SOUND OPERATION

•DC inverter compressor achieves a smoother operation and effectively reduces sound levels by eliminating the frequent start up of the compressor.
•Precision control achieved by vector inverter control
•Non-resonance motor brackets are used on the DC fan motor which ensures a smoother operation of the motor and reduces operating sound levels
•Larger fan diameter inspired by aviation design principles for quieter operation



COMPACT SIDE DISCHARGE DESIGN

Side discharge design eliminates the need for additional ventilation hood compared with a top discharge unit, ideal for narrow spaces.

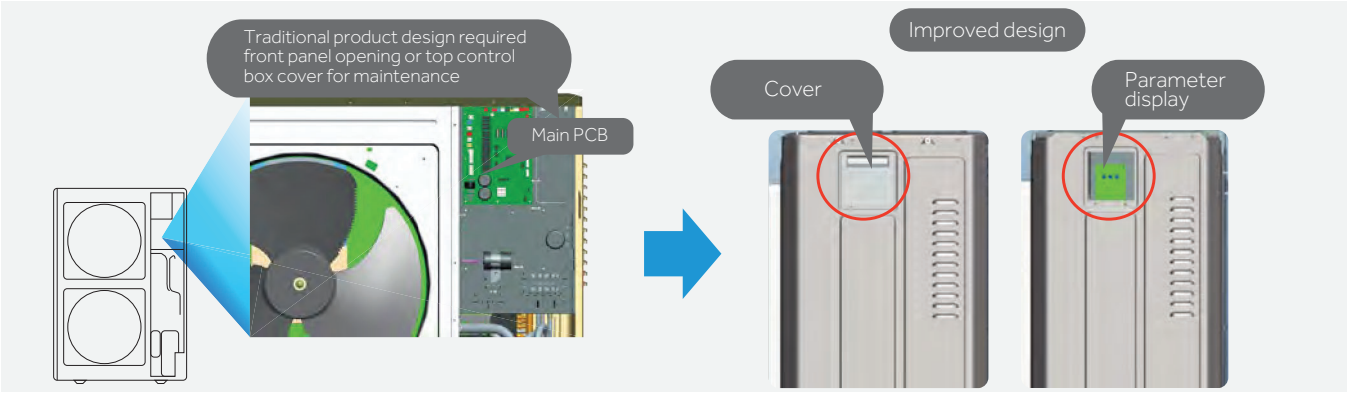
MRV S II - FEATURES

LONG PIPE LENGTH, INCREASED HEIGHT DROP

•Total pipe length: 300m
•Single pipe length: Max.175m
•From outdoor to the first branch pipe: 135m
•From the first branch to the furthest indoor door unit: 40m
•Height drop: 50m(outdoor above)/40m (outdoor below)
•Height drop between indoor units: 15m

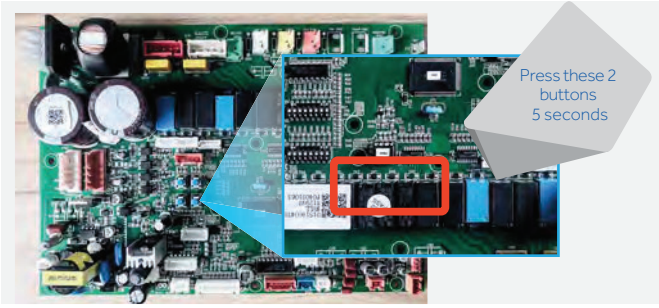
PARAMETER DISPLAY PANEL

The parameter display panel has been improved by moving it to the side of the unit.
The parameter can be easily accessed by directly opening the protective cover for maintenance.



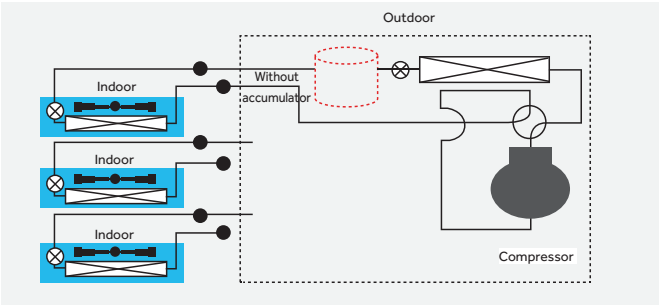
AUTOMATIC REFRIGERANT RECLAIM TECHNOLOGY

Set automatic refrigerant reclaim through the dip switch. The refrigerant in the indoor unit can be automatically returned to the outdoor unit. This is convenient during maintenance, reducing refrigerant waste, maintenance cost and time.



REFRIGERANT CONTROL TECHNOLOGY

Refrigerant control technology without high pressure accumulator, reduces the refrigerant volume and enhances operating efficiency.



HIGH AND LOW DOUBLE PRESSURE SENSOR

- Double pressure sensor with PID control technology.
- Combining high speed communication to quick start the compressor with more precise control the temperature can be controlled with a precision of ±0.5°C.

(a) With solder reduced from 22,22 to 19,05 for connecting the pipe to the unit valve accessory accompanying the product.

(b) The unit also works regularly with 9,52 diameter pipe. Requires 9,52>12,7 adapter to connect to the machine (not provided by Haier).
